

Integrated Participants Registration and Information System (IPRIS)

IPRIS is an internally developed database system which allows for on-line application for registration of registered persons of Bursa Securities and Bursa Derivatives. IPRIS is linked to the Securities Commission (SC)'s Electronic Licensing Application (ELA) system. This enables Straight Through Processing (STP) of applications from the brokers whereby brokers are able to make on-line submissions of registered persons to SC and Bursa (instead of separate submission of the application).
